# Yuyan Chen

(+86) 15307152883
Email: yuyanchen@hust.edu.cn
Personal Website: https://yuyanchen1010.github.io
Address: No. 1037 Luoyu Road, Hongshan District, Wuhan, Hubei Province, China, 430074

## Education

- 2024–2027 **Huazhong University of Science and Technology** **Landscape Architecture**
  **Ranking: 2/18 | GPA: 3.75/4.00** (Admitted through recommendation-based graduate admission)
  Relevant Coursework: Theories and Methods of Urban Social Space Research (4.0), Quantitative Methods in Urban and Rural Planning (4.0), Frontiers in Landscape Architecture Theory (4.0)
- 2020–2024 **Beijing Forestry University** **Landscape Architecture**
  **Ranking: 5/122 | GPA: 90.37/100**
  Relevant Coursework: History of Chinese Architecture (100), Meteorology (96), Principles of Urban and Rural Green Space System Planning (96), Landscape Ecology and Environment (96)

## Research Experiences

- **Research Interests**: Urban environmental exposure; spatial modelling; remote sensing and street-view imagery; multi-source data fusion.
- **Master's Thesis**: Synergistic Mechanisms of Carbon Sequestration and Pollution Mitigation Benefits of Urban Green Space at the Block Scale: A Case Study of Wuhan's Central Urban Area
- **Research Description**: Situated within China's national strategy of coordinating carbon reduction, pollution control, greening, and growth, this research focuses on the synergistic mechanisms of carbon sequestration enhancement and air pollution mitigation generated by urban green space in Wuhan's regulatory planning units. By integrating spatial analysis and interpretable machine learning, the study aims to support fine-scale urban planning and governance.
- **Academic and Research Achievements**

[1] **CHEN Y**, CHEN K, CHEN M, et al. Unravelling the Differentiated Effects of the Block Built Environment on $PM_{2.5}$ Concentrations: A New Research Framework based on the Perspective of Source-Flow-Sink[J]. Sustainable Cities and Society.( IF: 13.3，**Accept**)

[2] LI X, **CHEN Y**, WEN Y, et al. From Green Space to Park-Based Cooling Potential: Performance-Weighted Walkable Access to Urban Park Cooling in Detroit[J]. Sustainable Cities and Society, 2026, 115: 107603.（IF: 13.3，**Accept**）

[3] CHEN M, **CHEN Y**, CHEN K, et al. Urban Green-Space Configuration and $PM_{2.5}$ Pollution: Contrasting Associations from Remote Sensing and Street-View Perspectives[J]. City and Environment Interactions (**Under Review**)

[4] Dai, F., **Chen, Y**., Wang, Y., et al. Synergies and Trade-offs between Multidimensional Attributes of Urban Green Space and Carbon Reduction–Pollution Mitigation Benefits: A Case Study of Block Units in Wuhan's Central Urban Area. ( Completed, to be submitted)

➢ **Research Projects：**

1) **Key Program Grant Proposal, National Natural Science Foundation of China**: Theories and Methods of Urban and Rural Ecological Space Planning for Coordinated Carbon Reduction, Pollution Control, Greening, and Growth
**Main Contributions**: Responsible for drafting research contents, developing framework diagrams for sub-projects, formulating research methods, and designing proposed research plans.
2) **Major Project Proposal, National Social Science Fund of China**: Risk Monitoring and Prevention of Green Transition Based on Multi-source Spatiotemporal Heterogeneous Big Data
**Main Contributions**: Responsible for Sub-project III, Risk Identification and Dynamic Monitoring of Carbon Reduction–Pollution Mitigation Based on Multi-source Spatiotemporal Heterogeneous Big Data.
3) **ASLA 2026 Professional Category**: Lungs of the City: Optimizing Designing Streetscapes for Runner Health
**Main Contributions**: Responsible for data collection and processing, visualization of research results, and preparation of competition drawings.
4) **Science and Technology Planning Project, Wuhan Municipal Bureau of Natural Resources and Urban-Rural Development**: Theories and Methods of Urban and Rural Ecological Space Planning for Coordinated Carbon Reduction, Pollution Control, Greening, and Growth
**Main Contributions**: Technical Standards for Gross Ecosystem Product (GEP) Accounting in Wuhan
5) **Group Standard Compilation Project, Chinese Society of Landscape Architecture**
**Main Contributions**: Standards for Scenic Byway Planning and Design
**Open Cooperation Fund Proposal, State Key Laboratory of Mountain River Protection and Governance, Sichuan University**:Spatiotemporal Evolution Mechanisms and Influencing Factors of Ecological Product Value in the Lower Jinsha River

➢ **Conference Presentations：**

1) Participated in the 2025 Annual National Planning Conference and presented a poster; conference paper accepted.
2) Participated in the 14th and 15th Annual Conferences of the Chinese Society of Landscape Architecture; conference papers accepted.
3) Participated in the 15th and 16th Vision and Learning Seminar (VALSE).

## Honors and Awards

- Undergraduate Stage: **Outstanding Graduate of Beijing Forestry University**; Second-Class Outstanding Student Scholarship of Beijing Forestry University (3 times); Merit Student of Beijing Forestry University (2 times); Outstanding Organization Committee Member; Outstanding Student Cadre; Top Ten League Cadres of the School.
- Master’s Stage: **Science and Technology Innovation Scholarship of Huazhong University of Science and Technology**; First-Class and Second-Class Master’s Academic Scholarships of Huazhong University of Science and Technology.
- **IFLA Global Landscape Architecture Awards 2026 (Rank: 2/7)**
2nd place Worldwide, Student Stream—Urban Health and Well-being
- Silver Award, World Habitat Architecture and Environment Design Competition (Rank: 1/5).

## Skills

- **Language**: **IELTS 7.5** (L7.5, R9.0, W6.5, S6.5); **CET-6: 577**. Capable of independent academic writing in English, with strong English listening, speaking, reading, and writing skills.
- **Professional Software**: Proficient in spatial analysis software, including ArcGIS/QGIS, ENVI, InVEST, FRAGSTATS, GUIDOS, GeoDa, and eCognition Developer; familiar with Python, MATLAB, SPSS, MGWR, LaTeX, and CiteSpace; experienced in using AI-assisted programming tools such as Cursor and Codex; skilled in research-oriented graphic design software, including Photoshop, Illustrator, and InDesign.
